

To our patients of the Eger Eye Group:

We hope this email finds you healthy and seeing well. Even during a global pandemic, we want you to know that our care continues for you beyond your eyes. Last year at this time, we received an order from the CDC to halt all non-essential eye care which placed our practice into pandemic mode. It was quite a challenge, but our terrific doctors and staff mobilized and we were able to remain open for emergency and essential care while many practices closed their doors altogether. I am so proud of our Eger Eye team as they rallied and assisted in implementing safety and disinfection measures to resume all care last May. Our practice continues to remain diligent with those safety and sanitizing measures that allow our office to remain open and accessible for our community. In fact, we did not have one reported case of Covid-19 amongst us in 2020.

With every crisis comes opportunity. We continue to offer telehealth services when indicated, curbside dispensing of contacts and glasses, deliberate disinfection and safety measures, and a Priority List that actively reduces appointment waiting times. Moving 2 months of patients was a tall task and created some waiting for scheduled exams, but Brenda continues to actively manage the Priority List to move appointments and reduce appointment delays. We installed a new Optomap device that allows for touchless, enhanced retinal imaging, and often allows for an exam without dilation thus reducing exam time. Dr. Amber Ewonce, who joined our practice last summer, continues to get rave reviews. And we are very excited to announce that we have an even newer addition to our practice that certainly will enhance and provide greater access for care.

Dr. Veronica Constantine has joined our group and now the Eger Eye Group has a second location @ 400 Rouser Road, Bldg. 2, Suite 100 in Moon Township. Dr. Constantine has been practicing therapeutic optometry for 34 years and is a wonderful clinician. Later this year, Dr. Ewonce will join her and provide additional care in the Moon office. This will allow another option for our patients and will likely help reduce wait times for examinations. Certainly, all urgent and emergent situations will remain a top priority in scheduling. We will meld the two offices with technology that will allow for a cohesive experience regardless of what doctor or office you visit. More updates to follow.

“Getting together is the Beginning. Seeing together is Progress. Staying healthy together is our Vision!”

Take care,

Noah Eger
